FUND MANAGER'S REVIEW
Market Review

It was a relatively quiet month in Dec 2008 with the KLCI up by 1.2% on relatively muted window dressing activities. Most regional markets were also positive in Dec 2008. For the year, the KLCI fell by 39.3%, its worst YoY fall since the Asian Financial Crisis.

In terms of corporate development, YTL Power announced its acquisition of a 100% equity interest in PowerSeraya for S\$3.6bn from Singapore's Temasek Holdings. Towards the year end, news of fraud for Madoff investors rocked the financial world with the cost estimated at US\$50bn. Besides financial institutions, the financial crisis has affected the survival of large auto makers in the US.

Manager's Comments

The Fund managed to outperform its benchmark. Due to exceptional circumstances and extreme market volatility, the Fund's equity exposure remains at the 45% to 50% level to preserve capital.

Going forward, we will continue to adopt a defensive strategy given the heightened risk in the macro environment. In terms of stock selection, we would look for bottom fishing opportunities, special situations, and strong franchises. The equity exposure would be increased gradually when we anticipate greater stability in financial markets.
