December 2008

FUND OBJECTIVE

To provide capital growth for investors through a well-diversified balanced portfolio that is specially catered for a 10 year investment period. The Fund, over its investment period, shall progressively adopt more defensive investment strategies as the Fund approaches closer to maturity.

INVESTOR PROFILE

The Fund is suitable for investors who:-

- Seek an investment solution for a period of 10 years or more.
- Seek returns from a professionally managed Fund that is well diversified across various asset classes.
- Desire to have a Fund that would automatically become more defensive over time.

- Investment Manager : UOB-OSK Asset Management Sdn.Bhd.
- Benchmark : 40% performance FTSE BM Index)
60% RAM quantshop MGS 3-7
- Maturity Date : December 22, 2014

FUND MANAGER'S REVIEW

Market Review

It was a relatively quiet month in Dec 2008 with the KLCI up by 1.2% on relatively muted window dressing activities. Most regional markets were also positive in Dec 2008. For the year, the KLCI fell by 39.3%, its worst YoY fall since the Asian Financial Crisis.

In terms of corporate development, YTL Power announced its acquisition of a 100% equity interest in PowerSeraya for S\$3.6bn from Singapore's Temasek Holdings. Towards the year end, news of fraud for Madoff investors rocked the financial world with the cost estimated at US\$50bn. Besides financial institutions, the financial crisis has affected the survival of large auto makers in the US.

Malaysian government bonds (MGS) continued to be well bid with prices rising during first 3 weeks of the month. Prices were supported by slowing growth concerns and easing inflationary pressure. Economic data released during the month revealed that Malaysia's industrial production fell by larger quantum of 3.1% in October from a year ago, receding further from the 1.7% recorded in September.

Meanwhile, headline inflation rate continued to trend lower to 5.7% in November compared to 7.6% in October due to rapidly declining fuel price. On primary front, the RM2.5billion auction of MGS 7/19 attracted impressive bids-to-cover ratio of 2.19 times with an average yield of 3.481%. At the end of the period, the MGS yield curve parallel shifted downwards where the 3, 5, 10 and 20-year MGS eased by 33 to 48 bps to end at 2.92%, 3.00%, 3.22% and 3.73% respectively.

Manager's comment

The Fund has managed to outperform its benchmark. The Fund's equity weighting is generally low as we continue to be cautious due to the risk in the macro environment. Going forward, we will continue to adopt a defensive strategy until there is greater clarity on the macro front. In terms of stock selection, we would look for bottom fishing opportunities, special situations, and strong franchises.

In terms of fixed income, we prefer short to medium term high quality private debt securities for better yield pick-up as spreads for these securities have widened to multi year highs.
