- Investment Manager : UOB-OSK Asset Management Sdn. Bhd.
- Benchmark : 80% (performance of KL Syariah Index) + 20% (performance of KL Finance Index)

FUND MANAGER'S REVIEW

Market Review

The sell-off in equities continued into October with Asia bourses plunging between 12% to 31% MoM. Among the regional markets, Indonesia, Thailand, Hong Kong and China were hard hit while Australia, Taiwan and Malaysia markets fared relatively better. For the month, the KLCI declined 15.2% MoM to 863 points while the broader FBM Emas fell 16.1% to 5,668 points.

Amidst the global financial turmoil, the government will inject RM5 bn into Valuecap, a state-owned asset manager, to buy undervalued shares. Bank Negara will guarantee all deposits up to December 2010 and has eased mark-to-market regulations to maintain stability in the financial system. The central bank has also maintained the OPR at 3.5%. The government cut petrol prices further by 5% and diesel prices by 8% at the end of the month.

Manager's comment

The Fund has managed to outperform its benchmark. Due to the exceptional circumstances and extreme market volatility, the Fund has taken a temporary defensive position and lowered its equity exposure below the 50% minimum level to preserve capital. Furthermore, the decline in equity exposure was also due to our acceptance of the General Offer for UEM Builders.

Going forward, we will continue to adopt a defensive strategy given the heightened risk in the macro environment. In terms of stock selection, we would look for bottom fishing opportunities, special situations, and strong franchises. The equity exposure would be increased gradually when we anticipate greater stability in financial markets.
