FUND MANAGER'S REVIEW

Market Outlook

Accompanied by a turn in the second derivative of global economic activity and tentative signs of stabilization in important leading indicators, markets around the global have rallied. We believe we are indeed very close to the bottom in global economic activity, and may already be there, with the world economy set to start expanding again in coming months. However, we expect further market dips on profit taking until there are clear signs of the bottoming out of this economic down cycle. Given higher PE multiples relative to regional markets, the KLCI is likely to lag when regional markets rebound.

Manager's Comments

For the Second Capital Guaranteed Trust Fund, the cash buffer will be retained and a trading strategy will be adopted, with focus on more liquid names in the domestic market.

ASSET ALLOCATION AS AT APRIL 30, 2009

Investors are advised to read and understand the contents of the Master Prospectus dated April 25, 2006 (close ended fund) before investing. This prospectus has been registered and lodge with the Securities Commission. Among others, investors should consider the fees and charges involved. The price of units and distributions payable, if any, may go down as well as up. Past performance of the fund should not be taken as indicative of its future performance. Units for redemption will only be issued on receipt of a redemption application form, which are obtainable at Amanah Mutua Berhad or any Mayban distribution branches.

The Guarantor of the Fund is United Overseas Bank (Malaysia) Bhd ("UOB" Malaysia), which has been accorded an AA1 rating by Rating Agency Malaysia Berhad. UOB provides this guarantee to the trustee on behalf of the unit holders who hold their investments until maturity. Redemption of units before the maturity date would be based on the NAV of the Fund on that day and would be charged an exit fee. Therefore, the guarantee in this case does not apply. There may be a dilution of performance due to the guarantee structure being in place compared to a non-guaranteed conventional Fund. The guarantee is also subject to the credit risk of the guarantor and it does not give any assurance to the future solvency of the guarantor. The guarantee may be terminated under certain circumstances as described in the Prospectus of the Fund or further details on the guarantee, investors are advised to read and understand the contents of the guarantee documents of the Fund, which may be inspected, without charge at AMB.
