• Benchmark	: 90% of FTSE Bursa Malaysia EMAS Syariah Index 10% of 1-month General Investment Account-rates of commercial banks.

FUND MANAGER'S REVIEW

Market Review

In April 2009, the regional markets rallied on improving investors' risk appetite as some better-than-expected economic data raised optimism that the trough of recession is near. Countries like Jakarta, India and Taiwan lead the gains, up between 15% and 20.1%. KLCI's performance was slightly above with regional average, up 13.6% MoM to 991 points. The rally was broad-based and rotated between big cap blue chips and second liner bombed out stocks. The broader market's performance was much better, with FBM Emas Index gaining 14.8% to 6,542 points. Smaller caps were mixed as FBM KL second Board rose only 11.2% to 4,306 points while FBM Mesdaq jumped 18.5% to 3,488 points.

On domestic front, smooth political transition in the country's leadership to Datuk Seri Najib has boosted investors' confidence. The scrapping of 30% bumiputra stake on 27 services sectors and measures to liberalize financial sectors under the new administration were viewed positively.

Inflation continued to ease and is expected to moderate further with the lower petrol pump price and weaker economic environment. Hence, the central bank maintained its benchmark rate of 2.0% in recent April meeting. This was consistent with its earlier remark that it had frontloaded the reduction in OPR. BNM also cited that domestic economic conditions could improve in 2nd half of 2009 with aid of fiscal stimulus measures despite world economy uncertainty.

Manager's Comments

For the month of April, the Fund underperformed its benchmark. The underperformance was due to the Fund's relatively low equity weighting. While we believe that 2Q09 could mark the bottom of the market, we believe that the recent market upturn has been too sharp and there is a possibility of a correction. We would look to increase our equity exposure on pullbacks.
