FUND OBJECTIVE

To provide capital appreciation over the medium-term while providing 100% capital guarantee on the Maturity Date.

FUND MANAGER'S REVIEW

Market Outlook

The KLCI is expected to trade range bound with a downside bias as selling pressure emerges amid subdued volume. Investors are likely to remain on the sidelines focusing on corporate earnings. KLCI's failure to stay above its psychological level of 900 will now see support at 853 whilst facing resistance at 920. Rotational play to continue in water sector related stock on the likelihood of an upward revision to the offer price for privatization of water assets and construction sector pending details of the 2nd stimulus package to be tabled on Mar 10. With a challenging outlook ahead, asset allocation is the key to out performance. While the next few months are likely to remain volatile, we believe equities at current levels are attractive for investors with a 12-24 month horizon.

ASSET ALLOCATION AS AT FEBRUARY 28, 2009

Investors are advised to read and understand the contents of the Master Prospectus dated 25 April 2006 (close ended fund) before investing. This prospectus has been registered and lodge with the Securities Commission. Among others, investors should consider the fees and charges involved. The price of units and distributions payable, if any, may go down as well as up. Past performance of the fund should not be taken as indicative of its future performance. Units for redemption will only be issued on receipt of a redemption application form, which are obtainable at Amanah Mutual Berhad or any Mayban distribution branches.

The Guarantor of the Fund is United Overseas Bank (Malaysia) Bhd ("UOB" Malaysia), which has been accorded an AA1 rating by Rating Agency Malaysia Berhad. UOB provides this guarantee to the trustee on behalf of the unit holders who hold their investments until maturity. Redemption of units before the maturity date would be based on the NAV of the Fund on that day and would be charged an exit fee. Therefore, the guarantee in this case does not apply. There may be a dilution of performance due to the guarantee structure being in place compared to a non-guaranteed conventional Fund. The guarantee is also subject to the credit risk of the guarantor and it does not give any assurance to the future solvency of the guarantor. The guarantee may be terminated under certain circumstances as described in the Prospectus of the Fund or further details on the guarantee, investors are advised to read and understand the contents of the guarantee documents of the Fund, which may be inspected, without charge at AMB.
