- Benchmark : 90% of FTSE Bursa Malaysia EMAS Syariah Index  
10% of 1-month General Investment Account-rates of commercial banks.

## FUND MANAGER'S REVIEW

### Market Review

Despite steep declines on Wall Street and most regional equity markets, the KLCI stood resilient in the month of February gaining +0.7% MoM to 890.67. The broader market slightly outperformed the KLCI as the FBM Emas gained 0.9% to 5,847. The benchmark index managed to buck the downtrend despite a generally disappointing corporate reporting season in Feb.

BNM's move to cut the OPR by another 50 bps surprised the market and raised further concerns about the health of the economy. GDP growth in 4Q08 slowed down sharply from 4.7% in Q308 to 0.1%. The lower than expected GDP figure was mainly due to sluggish exports and slower growth in domestic demand.

On the corporate front, the key event was two significant rights issue announcement from Maybank and TMI. The stock prices of both companies were under pressure from the resulting announcements

### Manager's Comments

For the month of February, the Fund managed to outperform its benchmark despite its low equity weighting. Due to exceptional circumstances and extreme market volatility, the Fund's equity exposure is below the 40% level to preserve capital. Going forward, we will continue to adopt a defensive strategy given the heightened risk in the macro environment. In terms of stock selection, we would look for bottom fishing opportunities, special situations, and strong franchises. The equity exposure would be increased gradually when we anticipate greater stability in financial markets.

## PERFORMANCE RECORD
