January 2009

FUND OBJECTIVE

To provide capital growth for investors through a well-diversified balanced portfolio that is specially catered for a 10 year investment period. The Fund, over its investment period, shall progressively adopt more defensive investment strategies as the Fund approaches closer to maturity.

INVESTOR PROFILE

The Fund is suitable for investors who:-

- Seek an investment solution for a period of 10 years or more.
- Seek returns from a professionally managed Fund that is well diversified across various asset classes.
- Desire to have a Fund that would automatically become more defensive over time.

• Benchmark	: 40% performance FTSE BM Emas Index 60% RAM quantshop MGS 3-7 (medium)

FUND MANAGER'S REVIEW

Market Review

Asian bourses had a brief rally in early January only to fizzle out towards the end of the month. The best performing market was China which was up 9-10% MoM followed by Korea and Malaysia. The laggards were Japan, Hong Kong and Taiwan. The KLCI rose 0.9% MoM to 884 points while the broader index, FBMEmas rose 1.2% MoM to 5,793 points.

A slew of negative global economic data dominated the headlines. The US initial jobless claims for December 2008 exceeded market's expectations while its 4Q08 GDP fell 3.8% YoY. Japan's IPI fell 8.5% MoM, higher than the 8.1% expected while its jobless rate shot up to 4.4% vs the estimate of 4.1%. The US Fed retained the interest at 0.25% on 29 January. The new US President's US\$819 trillion fiscal stimulus package received the House's approval, and is now pending the Senate's approval. On the local front, BNM cut the OPR by 75bps to 2.5% on 21 January. Additionally, the Statutory Reserve Requirement (SRR) was lowered from 3.5% to 2%.

With intensifying recessionary pressure unfolding, Bank Negara Malaysia (BNM) sped up monetary easing by cutting Overnight Policy Rate (OPR) by 75bps from 3.25% to 2.50%, while Statutory Reserve Requirement (SRR) was cut by 150bps to 2% effective from 1st February. On the primary front, the RM3.5 billion 5-year MGS 4/14 auction attracted modest interest with 1.45 times bid to cover and at average yield of 3.643. Due to the larger than expected cut in OPR, buying interest pushed the MGS yield curve to bull steepened where the 3, 5, 10 and 20-year MGS eased by 36, 21, 11 and 12 bps to end at 2.56%, 2.79%, 3.11% and 3.61% respectively.

Manager's Comments

For the month of January, the Fund underperformed its benchmark marginally. This was due to the Fund's low equity weighting, which meant it did not participate much in the stockmarket's spurt in the earlier part of the month, and stock selection. We have maintained our invested level low as we believe that any rally would not be sustainable in the face of macro uncertainty.

The equity exposure is below the targeted asset allocation level as we are taking a defensive position in the face of adverse market conditions and extreme market volatility. We will increase the equity exposure when there is clarity on the macro front. In terms of stock selection, we would look for bottom fishing opportunities, special situations, and strong franchises.

In terms of fixed income, we prefer short to medium term high quality private debt securities for better yield pick-up as spreads for these securities have widened to multi year highs.
