- Financial Year : March 31
- Fund Category : Bond Fund
- Fund Type : Income and Growth Fund
- Fund inception : May 27, 2003
- Initial Sales Charge : Up to 2.00% of NAV
- Management Fee : Bond portion : 1.00% per annum of the NAV
Equity portion : 1.75% of NAV of the Fund
- Trustee Fee : 0.07 % per annum of the NAV
- Investment Manager : Maybank Investment Management Sdn. Bhd.
- Benchmark : 85% on the 5 years Malaysian Government Securities
: 15% of the 3-month Kuala Lumpur Interbank Offered Rates

FUND MANAGER'S REVIEW

Market Review

Supply concerns were heightened following the announcement of the RM60 billion second economic stimulus package on March 10. The "mini budget" entailed additional government spending and this will widen Malaysia's fiscal deficit from the earlier projected 4.8% of GDP to 7.6% of GDP in 2009. On March 20, Bank Negara revamped the entire 2009 Government Securities auction calendar, causing the MGS yield curve to flatten slightly. In the revised calendar, Bank Negara replaced the earlier longer tenured offerings with shorter and medium dated maturities. As a result, concerns over the supply along the 10-year part of the curve diminished significantly, leading to a rally of more than 30 bps along the 10-year MGS benchmark the day after the announcement. There was some light profit-taking towards the end of the month which saw yields rising back to 3.85% after seeing an intra-month low of 3.64%. In the primary market, demand for the two scheduled reopenings were lacklustre. The RM4.5bn 5-year benchmark reopening auction generated a smallish bid-to-cover ratio of just 1.46x, matching the same oversubscription rate of the same reopening back in January 2009. After scrapping the scheduled 10-year MGS reopening, Bank Negara replaced the offering with a 3-year MGS reopening amounting to RM4.5bn, which also generated a lukewarm 1.50 x bid-to-cover ratio. Meanwhile, the corporate bonds market was modestly stagnant in March as a lack of new pipeline supply caused liquidity in the secondary market to thin further. Investors were cautious and waiting for government bond yields to find a footing before taking a plunge back into the market. With confidence still quite shaky, the focus of fund flows were still towards the high grades.

Manager's Comments

The revamp in the auction calendar served to erase concerns of oversupply in certain benchmark tenures. However, it failed to address the fact that the Government would have to borrow at the steepest quantum since the 1970s. With a fiscal deficit of 7.6% of GDP, we estimate net borrowings to be very much higher than last year's figure of RM35.3 billion. Nonetheless, players can be comforted by the notion that there will be private placements this year to strategic investors.
