FUND MANAGER'S REVIEW

Market Review

Global equities rallied after recent US economic data suggested the bottoming of the US recession. Although Malaysia's benchmark KLCI rose by 5.4% to close at 1,044 pts, it lagged most regional markets. Within the region, the top performing markets were Taiwan, India, Vietnam and the Philippines. The broader market performed better than the KLCI as FBM Emas gained 6.8% to close at 6,984 pts. The weaker than expected GDP contraction did little to hamper market sentiment. Malaysia's 1Q09 GDP contracted by 6.2% YoY (vs market expectation of a 4% decline) as gross exports and fixed investments collapsed. Bank Negara Malaysia hinted that the weakness is expected to continue into 2Q09 but foresees sequential improvement in 2H09. Following that, the government has revised down its GDP forecast from +1% to -1% to -4% to -5%.

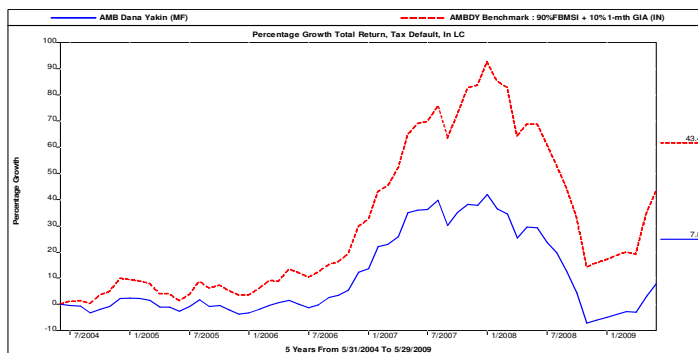

Manager's Comments

For the month of May, the Fund underperformed its benchmark. Although the Fund's equity weighting has been raised to the mid-60% level, it is still relatively low and this was the main reason for the Fund's underperformance. While we believe that 2Q09 could mark the bottom of the market, we believe that the recent market upturn has been too sharp and there is a possibility of a correction. We would look to increase our equity exposure on pullbacks.

5 Years Growth Total Return

ASSET ALLOCATION AS AT MAY 29, 2009

Based on the fund's portfolio returns as at 15 May 2009, the Volatility Factor (VF) for this fund is 14.51 and is classified as "Moderate" (source: Lipper). "Moderate" includes funds with VF that are above 11.960 but not more than 15.335. The VF means there is a possibility for the fund in generating an upside return or downside around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF funds. VF is subject to monthly revision and VC will be revised every six months. The fund's portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC
