FUND MANAGER'S REVIEW

Market Review

The weakness in the Malaysian Government Securities "MGS" market continued, market sentiment was also affected by poor performance of US Treasuries and announcement of the new 10-year MGS tender of RM4.0 billion. Immediately after the tender announcement, existing 10-year benchmark yields spiked up more than 25 basis points. By month end, 3-, 5- and 10-year MGS benchmark performance was mixed, closing +5 bps at 2.69%, -2 bps at 3.60% and +32 bps at 4.30% respectively. On corporate bonds, activity was largely focused on high grade segments. Short end of AAA yield curve performed better than the medium to long end yield curve. Meanwhile, new corporate bond issuances in May include the RM600.0 million Plus Sukuk Musyarakah MTN and RM1.0 billion Public Bank Bhd Non Innovative Tier 1.

Manager's Comments

We think the MGS market will be soft if not weaker from here, primarily due to lingering supply concerns and lack of catalyst in terms of further OPR cuts. We are however optimistic on the AA rated segment of corporate credits as at current market levels, the corporate bond spreads remain attractive. Our strategy is to be fully invested and target below benchmark duration. In terms of asset allocation, we are underweight in terms of MGS and government guaranteed papers but overweight in terms of medium term corporate bonds.

ASSET ALLOCATION AS AT MAY 29, 2009

Based on the fund's portfolio returns as at 15 May 2009, the Volatility Factor (VF) for this fund is 10.11 and is classified as "Low" (source: Lipper). "Low" includes funds with VF that are above 5.035 but not more than 11.960. The VF means there is a possibility for the fund in generating an upside return or downside around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF funds. VF is subject to monthly revision and VC will be revised every six months. The fund's portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC
