Investment Manager	: UOB-OSK Asset Management Sdn Bhd
Benchmark	: 40% of FBM Emas Index : 60% of RAM Quantshop MGS Index

**FUND MANAGER'S REVIEW**

**Market Review**

The performance of regional markets was mixed in Oct 2009 with China, Philippines, and Hong Kong leading the gainers while India and Korea were laggards. The FBM KLCI improved 3.4% for the month with banks featuring strongly among the index's top movers. The gain on the FBM KLCI was ahead of the FBM100 and FBM Emas which were up 3.0% and 2.9% respectively for the month. The announcement of the Budget 2010 was within market expectations with the Government taking steps to deal with the budget deficit by cutting operating expenditure. The budget deficit is forecast to narrow to 5.6% of GDP in 2010 from 7.4% of GDP in 2009. The government expects real GDP to shrink 3% in 2009 and to rebound by 2-3% in 2010. Among the surprises in the Budget was the imposition of Real Property Gains Tax (RPGT) of 5%. Property stocks saw weakness as a result of the government's proposal. Ringgit sovereign bonds weakened across all maturities as improving economic data dampened demand for government securities. In addition, supply concerns and increased risk appetite toward corporate debts further dampened the sentiment in MGS market. As expected, BNM left its policy rate unchanged at 2.0% for the fifth consecutively time citing that the current monetary policy stance is appropriate in providing support to economic activity. At the end of the period, MGS yield curve bear steepened with the 3, 5, 10 and 20-year MGS trading 7 to 17 bps higher to end at 2.95%, 3.91%, 4.27% and 4.73% respectively. In the recent Budget announcement, the government is instilling a much needed fiscal discipline in its annual budget for 2010. It plans to cut operating expenditure by 13.7% to bring the 2010 deficit down to 5.6% of GDP from a revised 7.4% in 2009. The Ministry of Finance (MOF) expects real GDP growth of 2-3% in 2010, supported by improving private consumption and recovering in private investment. The MOF also revised its GDP forecast for 2009 to -3.0%, better than the previous estimate of -4.0% to -5.0%.

**Comments**

For the month of Oct, the Fund outperformed its benchmark despite lowering its equity exposure after locking in some gains. We would look to increase our equity exposure on pullbacks.

Based on the fund's portfolio returns as at 15 October 2009, the Volatility Factor (VF) for this fund is 7.5 and its Volatility Class (VC) is classified as "Low" (source: Lipper). The VF means there is a possibility for the fund in generating an upside return or downside return around this VF. The VC is assigned by Lipper based on quintile ranks of VF for qualified funds. The fund's portfolio may have changed and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC.

Investors are advised to read and understand the contents of the Master Prospectus dated September 17, 2009, and the First Supplementary Master Prospectus dated October 30, 2009, before investing. These prospectuses have been registered and lodged with the Securities Commission. Among others, investor should consider the fees and charges involved. The price of units and distributions payable, if any, may go down as well as up. Past performances of the fund should not be taken as indicative of its future performance. Units will only be issued on receipt of an application form referred to in and accompanying the Prospectuses, which are obtainable at Amanah Mutual Berhad or any of its distribution branch.
