FUND MANAGER'S REVIEW

Market Review

The MGS yield curve bull flattened in August and strong interest was seen particularly in the mid to longer-end maturities. The strong buying was supported by a benign inflationary backdrop as well as MYR strength (due primarily to further foreign exchange liberalization). On 18 August, BNM had liberalized its existing foreign exchange administration rules by broadly allowing settlement of goods and services in MYR amongst other loosening of measures. Although the liberalization does not equate to MYR internationalization, the move was read positively by market participants and is widely seen to be moving one step closer to scrapping the current ban on offshore MYR trading.

Similar to MGS, PDS trading activities saw heavy volume and remained fairly well supported. AAA rated names again saw the most trading volume for the month. Primary issuances were considerably more active for the month with a total of RM4.915 billion issued, mainly concentrated within the AAA rating category. Notable issuers who tapped the bond market for the month were Abu Dhabi Commercial Bank, Malaysia Airports Capital Berhad, Cagamas Bhd, Berjaya Citi (Danajamin Guaranteed), Malaysia Debt Ventures (Government Guaranteed) and Padiberas Berhad. Majority of the higher rated primary issuances were well received by the market due to lack of new papers in the market.

Comments

We foresee BNM taking a breather in terms of OPR hikes, hence we believe OPR will stand pat at 2.75% for the rest of the year. Our strategy remains unchanged, remain overweight on Corporate Bonds due to still attractive credit spreads while adopting a trading stance on MGS.
