FUND MANAGER'S REVIEW

Market Review

The Malaysian stock market continued to march upwards in July, with the FBM KLCI rising 46.9 points or 3.6% higher than previous month to close at 1,360.9 points. The broader index FBM EMAS rose 3.9% to 8,863 points. Smaller caps outperformed as the FBM Small Cap gained 7.3% to 10,759 points as those stocks played catch up. Among the regional bourses, the China and Taiwan markets were the best performing markets whilst the Japan and India markets were the laggards.

In addition, the government announced a price hike for petrol, gas, diesel and sugar as part of the first steps in a gradual subsidy rationalisation which will save RM 750mn a year. Finally Bank Negara raised borrowing cost for the 3rd time this year, raising the benchmark rate to 2.75%.

Comments

For the month of July, the Fund underperformed its benchmark mainly due to stock selection. We would maintain our equity weighting within the 75-85% region and would look to increase our equity exposure on pullbacks.
