FUND MANAGER'S REVIEW

Market Review

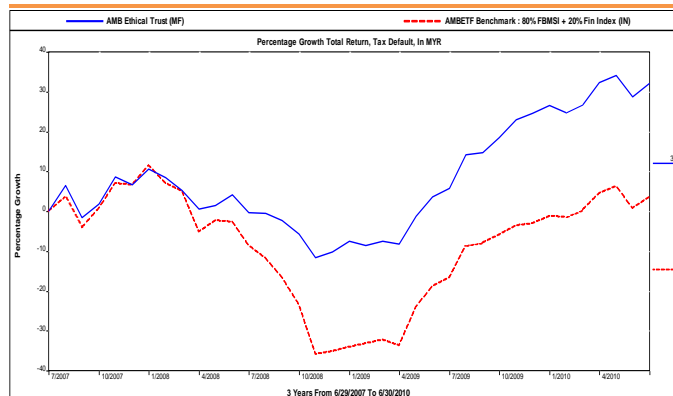

The month of June was a month of mixed market performance, with some markets seeing a sharp rebound whilst others continued to deteriorate. The FBM KLCI gained 2.3% to close at 1,314 points while the broader index FBM EMAS rose 2.5% to close at 8,863 points. Among the regional bourses, the Thai and Indonesian markets were the best performing markets whilst Japan and China markets continued to decline during the month. Meanwhile uncertainty persisted in the global economy especially in Europe as the sovereign crisis continued. At the same time, the credit tightening measures in China and the fear of an unsustainable asset bubble added to the concerns.

Comments

For the month of June, the Fund outperformed its benchmark mainly due to stock selection. We would maintain our equity weighting within the 75-85% region and would look to increase our equity exposure on pullbacks.
