FUND MANAGER'S REVIEW

Market Review

In May, Malaysia successfully issued US\$1.25 billion of 5 year Sukuk bonds with a yield spread of 180bps over US Treasuries. This marked the country's first global sovereign bond issuance in eight years. Order book for the Sukuk was more than four times oversubscribed signaling good investor response to Malaysia's USD denominated issue.

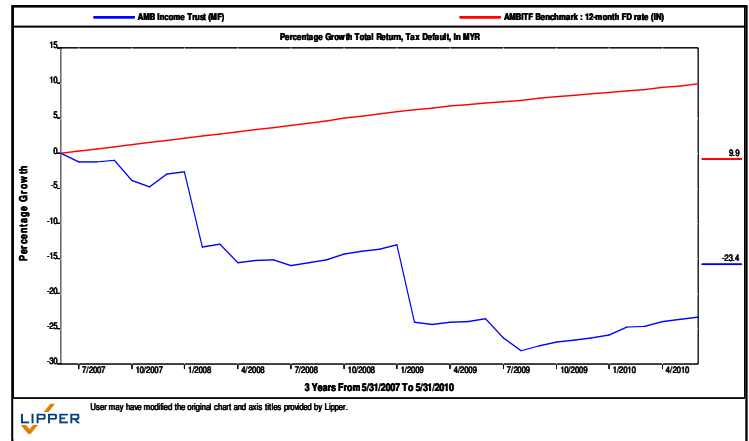

Comments

We will continue to focus on corporate bonds as we are of the view that the corporate bond market will remain well supported in view of the present lack of supply. On the govies, we will adopt a cautious stance with a short term trading view. We remain cautious on potential reversal of hot money which may shift the sovereign curve higher.

Our strategy is unchanged. We remain fully invested and are still overweight corporate bonds vs MGS. We look forward to an increase in primary corporate bond issuances in the next few months. We target neutral duration to benchmark for unconstrained portfolios
