FUND MANAGER'S REVIEW

Market Review

For the month of May, most regional markets posted negative returns, with the FBM KLCI losing 4.6% to close at 1,285 pts while the broader index FBM Emas was down 5.0% to close at 8,645 pts. Among regional bourses, Thailand and the Philippine were the best performing markets whilst Japan and China were laggards.

Overall investor confidence was rattled by the European sovereign debt crisis, the standoff between the two Koreas as well as anticipation of credit tightening moves by China. Meanwhile, some company specific events also contributed to the weak Malaysian market.

Comments

For the month, the Fund outperformed its benchmark mainly due to stock selection. We would maintain our equity weighting within the 75-85% region and would look to increase our equity exposure on pullbacks.

Based on the fund's portfolio returns as at March 15, 2010, the Volatility Factor (VF) for this fund is 14.8 and its Volatility Class (VC) is classified as "Moderate" (source: Lipper). The VF means there is a possibility for the fund in generating an upside return or downside return around this VF. The VC is assigned by Lipper based on quintile ranks of VF for qualified funds. The fund's portfolio may have changed and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC.

Investors are advised to read and understand the contents of the Master Prospectus dated September 17, 2009, and the First Supplementary Master Prospectus dated October 30, 2009, before investing. These prospectuses have been registered and lodged with the Securities Commission. Among others, investor should consider the fees and charges involved. The price of units and distributions payable, if any, may go down as well as up. Past performances of the fund should not be taken as indicative of its future performance.
