FUND MANAGER'S REVIEW

Market Review

After a strong rebound in October, the local market experienced a slight decline in November. For the month, the FBM KLCI fell 20 points or 1.3% to close at 1,472 points. The broader market outperformed the FBM KLCI as the FBM EMAS fell 1.0% to 10,064 points. Smaller caps also outperformed as the FBM Small Cap only declined 0.3% to 11,517 points. Among the regional bourses, the Hong Kong and Taiwan markets were the worst performers while the Thailand market was the only major market that posted positive return.

During the month, Malaysia published its 3Q11 GDP performance which showed a better than expected 5.8% yoy growth. This was largely due to the robust expansion of domestic demand as consumer spending and public expenditure continued to see strong growth. At the Monetary Policy Committee (MPC) meeting in November, Bank Negara Malaysia (BNM) decided to maintain the Overnight Policy Rate (OPR) at 3.00%. BNM commented that while the domestic economy is expected to expand, the latest indicators suggest that the global growth momentum has moderated in recent months and this could affect the overall growth prospects of the Malaysian economy.

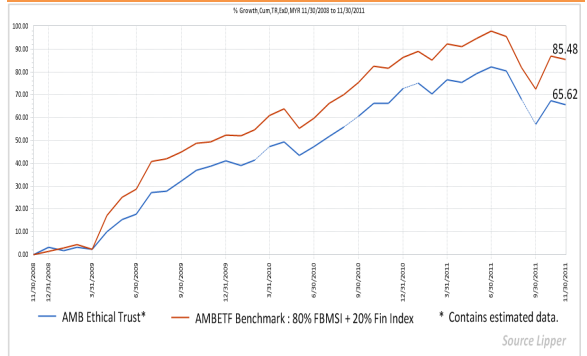

BNM also issued guidelines to financial institutions aimed at promoting prudent, responsible and transparent retail financing practices. The guidelines which will take effect from 1 January 2012 will also be applied on credit cooperatives. Some of the measures include the need for banks to conduct affordability assessments based on income after statutory deductions for tax and EPF and a tenure cap for hire purchase financing at nine years.

Manager's Comments

For the month of November, the Fund outperformed its benchmark slightly mainly due to stock selection. We would maintain our equity weighting within the 75-85% region and would look to increase our equity exposure on pullbacks.
