FUND MANAGER'S REVIEW

Market Review

Global markets recovered strongly in October following two months of sharp declines after optimism returned to the market when Eurozone leaders reached an agreement to address the debt crisis. The preliminary agreement involved a significant 50% write-down of Greek sovereign debt, recapitalisation of vulnerable European banks and the leveraging up of the European Financial Stability Facility (EFSF) bailout fund albeit details are still being finalised.

For the month, the FBMKLCI rallied 105 points or 7.6% to close at 1,492 points. The broader index FBM EMAS rose 8.2% to 10,169 points. Smaller caps outperformed as the FBM Small Cap jumped 11.1% to 11,546 points. Among the regional bourses, Hong Kong and Korea were the best performing markets whilst China and Japan were the laggards.

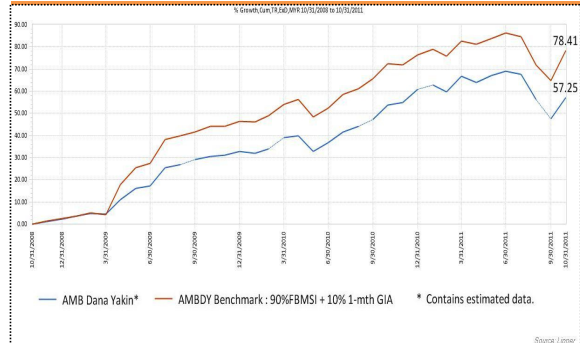

Meanwhile the Government tabled a people friendly Budget 2012 with generous one-off cash payments to a wide spectrum of beneficiaries including the low income households. The Government also increased the Real Property Gains Tax on properties held and disposed within 2 years from 5% to 10%. Finally, Malaysia's GDP for 2Q 2011 also slowed to 4.0% from 4.9% in the previous quarter due in part to the weaker external environment causing a slowdown in export orders.

Manager's Comments

For the month of October, the Fund underperformed its benchmark mainly due to the conservative asset allocation and stock selection. We would maintain our equity weighting within the 75-85% region and would look to increase our equity exposure on pullbacks.
