## INDUSTRY'S KEY INDICATORS

- The overall unit trust industry key indicators continued to expand at a slower pace as at end-March 2009 following a broad-based decline by major indices for the past two months, which diminished investors' confidence to invest in the unit trust as well as UTMCs effort to launch new products in the market.
- The industry approved fund size increased at the same rate as the previous month by 0.5%, or 2.435B units, to 512.306B units as against 509.871B units charted in the prior month. The continuous growth was supported by new products launched in the market with a total AFS of 850M units and continuous expansion in Amanah Saham Bumiputera fund size.
- Compared with the same period last year, the industry AFS grew by 11.7% y-o-y from 458.710B units recorded as at end-March 2008.
- The pace of supply was initially slow as reflected by three new funds were launched by UTMCs vis-à-vis 12 funds being introduced during the same period last year. This has brought the total number of funds in the market rose to 571 funds, representing a yearly growth of 8.6% from 526 funds registered during the same period last year.
- Based on the fund categories available in the market, equity Malaysia funds continued to dominate the industry with 164 funds, followed by 103 offshore funds, 90 equity Islamic, 56 money market funds, 53 guaranteed, 41 bond general funds, 20 bond Islamic, 16 target maturity funds, 11 REITs funds and 10 bond offshore funds.
- The demand side of the industry also charted a continuous slowdown, reflected by the slower rate of monthly growth of units in circulation (UIC), expanding at the same rate as the previous month by 0.6% to 247.533B units. The global stock market turmoil and increasing number of non-performing funds for the past few months have spooked investors from investing in the unit trust.
- Compared with the same period last year, the industry UIC increased by 12.3% y-o-y from 220.498B units posted as at end-March 2008, slower than 36.9% registered a year ago.
- However, the slight growth in the industry UIC during the month was supported by the equity funds as investors were expecting the stock markets to pick-up in the 2H2009. During the month, Equity Islamic contributes 41.0% from the total unit trust sales with 633.91M units being sold to investors while equity Malaysia funds added 401.26M units, or 26.2%, during the month. Equity offshore funds, however, pullback slightly by 0.7% from the previous month with a net redemption of 350.29M units.
- Investors also were keen to invest in short-term funds through money market asset class, which increase by 3.3% or 533.61M units to 16.644B units.

## INDUSTRY'S NAV vs. MCAP

## INDUSTRY'S RATIO (NAV/NAC)

## INDUSTRY'S KEY RATIOS (UIC/NAC)

## INDUSTRY'S SUBSCRIPTION RATE

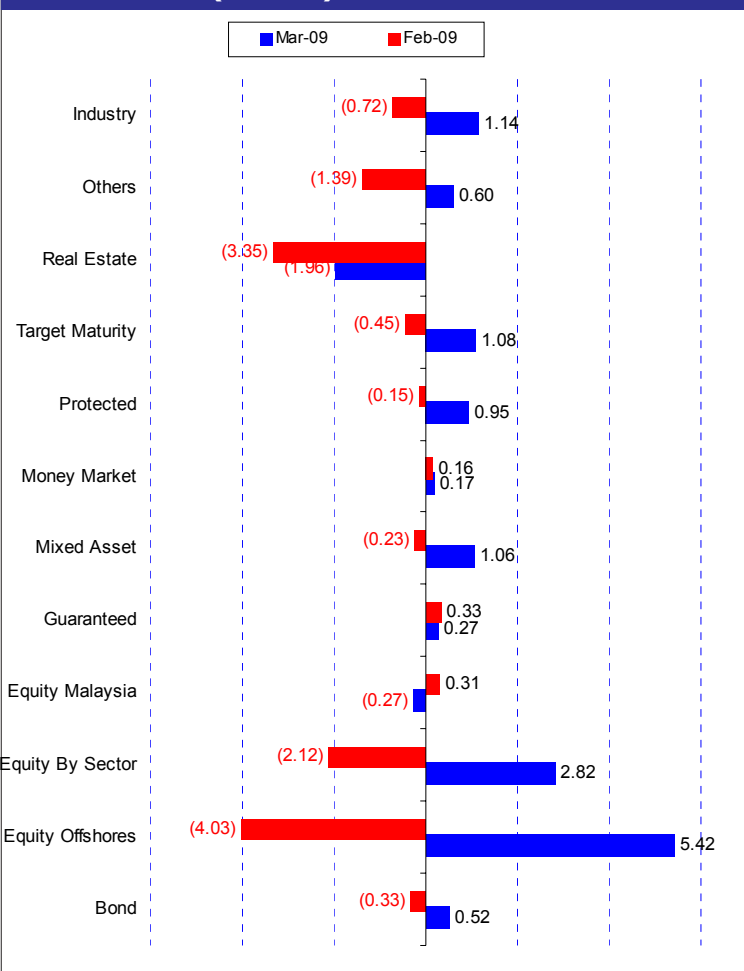

- Despite the positive growth charted by the industry AFS and UIC, the industry net asset value (NAV) had registered a negative for the month, dropping 1.7% m-o-m, or RM2.335B, to RM138.126B.
- The industry NAV failed to maintain its performance posted in January and February this year following 2.0% m-o-m decline charted by the KLCI as at end-March 2009. Compared with the same period last year, the industry NAV fell by 13.5%.
- The dismal performance of the industry NAV was dragged down by the equity Malaysia asset class funds, which fell by 4.3%, or RM3.710B, led by equity income funds dropped by RM3.662B.
- The contraction in value of the industry's NAV coupled with moderate inflow of new accounts during the month had caused the investment per account to plunge by 20.9% from the same period last year to RM10,633.96 per account (Jan-March 2009: RM13,444.07).

## NEW FUNDS LAUNCHED

- In March, three new funds were launched with total approved fund size of 850M units valued at RM650M as against 12 funds totalling 7.350B units worth at RM3.570B during the same period last year.
- The three funds were HwangDBS US Access 80 (Par value: RM1.00; AFS: 300M), OSK-UOB Energy (Par value: 50 sen; AFS: 400M) and RHB China Averaging Capital Protected (Par value: RM1.00; AFS: 150M).
- As at year-to-date, nine funds were introduced by seven UTMCs compared with 26 funds being offered during the same period last year. Based on the pattern of new products launched during the first quarter, UTMCs preferred to launch risk-averse funds namely guaranteed funds, bond funds and money market funds following uncertainty outlook in the equity markets and also to anticipate investors' risk appetites.

## PERFORMANCE (% MOM) BY CATEGORY FEB vs. MAR 09

## FUND PERFORMANCE

- In view of the positive performance charted by the global markets across the board, the industry benchmark posted a positive average return of 1.14% m-o-m after recording a negative return of 0.72% in the previous month.
- Almost all funds in various categories charted returns on the plus side with the exception of the equity Malaysia category with 0.27% loss following a decline of 2.03% charted by the KLCI.
- For the month ended March 2009, the positive performance of the industry was also supported by the equity offshore macro classification, which outperformed the benchmark by 4.8 times with an average monthly return of 5.42%.
- The best performers within this class of funds were made up of quite diverse portfolios as the rising tide of positive sentiment toward equities lifted all boats across sectors with equity emerging markets far east and equity China categories advanced further, charting 15.62% and 10.58% m-o-m growth during the month.
- Besides the equity offshore category, the equity by sectors also outperformed the industry average with 2.42% m-o-m with all its sub-sectors delivered positive returns except for equity sector utilities and equity sector general industry with 2.69% and 0.53% drops respectively.
