INDUSTRY'S KEY INDICATORS

- The Malaysian unit trust industry (MUTI) posted steady growth in May, despite a cautious investment environment by both supply and demand side of the local unit industry.
- After a convincing growth charted by the industry approved fund size (AFS) in the previous month by 2.7% m-o-m, the **industry AFS charted a modest monthly growth of 0.5%** to 528.985B units in May.
- Compared with the same period last year, the industry AFS expand at a single-digit growth of 9.2% vis-à-vis 31.7% increase registered a year ago. The further reduction in the expansion rate of the industry AFS reflected the continued slowdown in new launches among UTMCS and continued deterioration in demand among investors.
- Meanwhile, on a year-to-date basis, industry AFS grew by 5.1% or 25.549B units as against last year's five months growth of 11.4% totalling 49.653B units.

- Consequently, the **total number of funds under management rose to 578 funds**, representing an increase of 7.0% from 540 funds in the same period last year.
- Based on number of funds in the industry, a big chunk of the unit trust funds offered in the market are categorised under equity funds, led by equity Malaysia with 164 funds (fell 9.4% y-o-y from 181 funds), followed by equity offshore increased 10.4% y-o-y to 106 funds and equity Islamic funds gained 18.2% y-o-y to 91 funds.
- Bond funds increased 6.0% y-o-y to 71 funds, guaranteed funds increased by 20.5% y-o-y to 53 funds, money market funds surged 35.6% y-o-y to 61 funds while target maturity funds shrank 18.8% y-o-y to 13 funds due to maturity.
- Subsequently, the sales of the unit trust also charted a slowdown in growth, which saw the **industry units in circulation (UIC) grew at 1.5% m-o-m to 256.902B units**. Based on the historical trend, the slowdown in new launches would somehow impact demand for unit trust products and investors' interest, especially in the unfavourable economic conditions.
- Sales during the month was mostly derived from existing products particularly equity funds with the new funds, generally fixed income funds, which only contributed 25.1% market share of the total UIC.
- Furthermore, we seen a quite significant demand in the existing equity funds in the market as investors have been influenced by the rally in the stock markets since early April 2009.
- As a result, the equity offshore funds gained 2.6% m-o-m to 1.281B units, followed by equity Islamic with 2.7% m-o-m to 1.219B units while equity Malaysia generated modest sales of 0.7% m-o-m to 0.787B units.
- We also noticed continuous outflow of funds in low risk or defensive funds as investors try to anticipate the rallied in the stock markets for the 2H2009 by entering equity funds.
- Bond funds, in general, had experienced a net redemption of 153.01M units, while guaranteed funds fell 245.95M units from the previous month. Money market funds, on the other hand, continued to expand favourably by 565.28M units.
- On a yearly basis, the industry's UIC maintained its previous growth of 12.0% during the month, adding 27.564B units this year from 229.338B units recorded during the same period last year. As at YTD, the industry's UIC grew by 7.1%, or 16.933B units, which is in tandem with 7.4% increase or 15.892B units recorded from the corresponding period last year.
- Additionally, the industry's net asset value (NAV) had posted positive results for two consecutive months supported by equity funds. The industry NAV had registered 6.0% m-o-m, or RM9.185B, after a sudden surged of 11.4% m-o-m spotted in the previous month, to RM163.095B by tracking the gains made by the KLCI and global indices.
- Based on the above monthly growth, equity Malaysia category contributed 71.1% market share or RM6.529B from the total NAV during that period, led by equity income funds worth RM5.762B. Equity offshore ranked as the second highest

contributor for the month with 17.2% market share of the industry NAV totalling RM1.580B with all its sub-sector contributed favourable growth. Meanwhile, equity Islamic ranked third largest contributor during the month with 12.0% market share valued at RM1.105B.

- Other classifications namely bond, guaranteed and target maturity funds had showed slight pullback in May totalling RM360.5M, following net withdrawals of 400M units occurred during the month.
- As compared with the preceding period last year, the industry NAV still posted negative growth of 2.1% during the month given the high base value of RM166.6B recorded as at end May 2008.
- Going forward, we are confident on the recovery of the unit trust industry in the 2H2009 in anticipation of the global economic revival despite some hick-ups in the stock market through out the year. Therefore, as for the whole year of 2009, we expect industry NAV to advance further by 30% y-o-y or RM47.4B to RM181.0B with a monthly average growth of 1.5%.

NEW FUNDS LAUNCHED

- As the investors' appetite shrank reflected by the growth of the industry UIC, the number of unit trust funds launched overall has also dropped.
- In May, seven new funds were launched by seven UTMCS with total fund sizes of 4.920B units valued at RM2.545B. As year-to-date, 23 funds were introduced in the market as against 39 funds in the same period last year following cautious strategy applied by UTMCS.
- In general, new funds launched this year consisted of five bond and guaranteed funds respectively, three equity offshore and money market funds correspondingly and one equity Malaysia fund while five funds remained unclassified.
- Despite there were more low risk products being introduced by UTMCS, they also had emphasised on the investors' affordability and saleability of the products. This has been prevalent trend as most of the products being launched had smaller par value below RM1.00.
- In fact, as at end-May 2009, there were 330 funds (57.0% market share) in the market had par value below 50 sen while others (43.0%) had par value range between RM1 to RM100 per units with fund size ranging RM250M to RM500M.
- In May, the seven new launches were Areca Steady fixedINCOME (Par value: RM1.00 ; AFS: 500M units), HwangDBS AIIMAN Sukuk (Par value: 50 sen; AFS: 400M units), ING Principal Protected Income II (Par value: RM1.00 ; AFS: 1B units), OSK-UOB Capital Protected One Advantage (Par value: RM1.00 ; AFS: 120M units), Pacific Focus China (Par value: 25 sen ; AFS: 600M units), PB Australia Dynamic Balanced (Par value: 25 sen ; AFS: 800M units).
